

Best Poster Award

Award

The winning 1st author will be exempted from the participation fee for the 2018 Symposium!

Evaluation Methodology and Criteria

There will be one poster awarded for each faculty (a total of 5 posters will be awarded for this year's Symposium). Each faculty will assign a committee of 4-7 members. Each member of the committee will evaluate only the posters displayed in his/her section, scoring them individually on a scale of 1-10, based on the following two weighted themes:

Content 70%:

- Clear research question/hypothesis;
- Method/methodology clearly explained;
- Study results/conclusions are clear;
- Novel and relevant scientific content.

Layout/Design 30%:

- Structured layout;
- High readability;
- Data/graphs/images are appropriately labeled;
- Bibliography is available (though not necessarily displayed on the poster).

The final score will be an average of each member's individual score. The award is open to all posters presented at the event, all of the materials being eligible and will be given equal consideration for the award.
